Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Mutou (US 4110888).

Mutou discloses a damper (see Fig. 4) comprising a closed pressure tube 1 having an inner cylindrical surface which forms a sealed working chamber, a piston 5 disposed within said sealed working chamber, said piston slidably engaging said inner cylindrical surface of said pressure tube to divide a first portion of said working chamber into an upper working chamber and a lower working chamber, a first flow path extending through said piston to provide communication between said upper working chamber and said lower working chamber, a valve body 3 disposed within said working chamber to define with said inner cylindrical surface of said pressure tube a fluid chamber located in a second portion of said working chamber said valve body being fixedly secured to said inner cylindrical surface of said pressure tube; and a second flow path extending through said valve body to provide communication between said lower working chamber and said fluid chamber, said second fluid flow path being a continuously open flow path.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 6 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mutou in view of Postema et al. (US 4139186).

Mutou fails to disclose compression or extension valves attached to the piston. In the context of open flow valve body shock absorbers, Postema discloses such valves. It would have been obvious to one of ordinary skill in the art to which the invention pertains at the time the invention was made to have included compression or extension valves attached to the piston of Mutou according to the teachings of Postema et al. in order to achieve required damping, see Postema et al. col. 3 lines 2-5.

Response to Arguments

5. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.
